## **DETAILED ACTION**

## Response to Amendment

- 1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
- 2. The Amendment submitted on March 19, 2004, has been entered. Claims 1-3 have been cancelled. Claims 4-5 have been added. Therefore, the pending claims are 4-5.
- 3. The amendment is sufficient to overcome the 35 USC 112 rejections since the claims include composition limitations and method limitations which further define the structure of the final product. Further, the claims are now commensurate in scope with the product taught -described in the disclosure.

## Reasons for Allowance

- 4. The following is an examiner's statement of reasons for allowance:
- 5. The prior art fails to teach a nonwoven fabric made from polyurethane filaments produced by dehydrating a polyurethane elastomer having a Shore A hardness of not less than 92 to reduce the moisture content to no more than 150 ppm, then fusing the filaments together to form the nonwoven fabric. While Muramoto et al. (5,308,697) and Yamakawa et al. (6,248,445) disclose it is known to make polyurethane filaments from polyurethane material having a Shore A hardness of not less than 92, the prior art fails to teach dehydrating the polymer to a certain moisture content or laminating the film at a temperature 35°C lower than the Vicat softening temperature.

As shown in the examples and the comparative examples set forth in the disclosure, the nonwoven fabric will not have the claimed properties unless the Shore A hardness, moisture content, and laminating temperature are controlled as claimed. Therefore, claims 4 and 5 are

Page 3

Application/Control Number: 09/890,742

Art Unit: 1771

allowable since the prior art fails to teach or fairly suggest controlling the moisture content and the laminating temperature of the material during processing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenna-Leigh Befumo whose telephone number is (571) 272-1472. The examiner can normally be reached on Monday - Friday (8:00 - 5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (571) 272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
